

SUONG RANET

Address: Sangkat Tuol Sangke, Khan Russey Keo, Phnom Penh

Contact: +(855) 96 488 8551 | suongranet98@gmail.com

Summary

Driven Software Development student at Norton University specializing in full-stack web development with React, Node.js, and PostgreSQL. Experienced in building secure REST APIs and modern web applications, seeking hands-on software software internship opportunities.

Technical Skills

- Languages
JavaScript, TypeScript, Python, Java, HTML5, CSS3
- Frontend
React.js, Tailwind CSS, Bootstrap
- Backend
Node.js (Express), Java (Spring Boot)
- Database
MySQL, PostgreSQL, Neon Postgres
- Deployment & Hosting
Vercel, Render, Netlify
- Developer Tools
Git, GitHub, Postman

Languages

- Khmer - Native
- English - basic

Education

Norton University – Phnom Penh

Bachelor Degree in Software Development

2023 – Present

Technical Experience Overview

- Full-Stack Development: Developed end-to-end web applications by integrating responsive React.js/TypeScript frontends with Node.js and Express.js RESTful backends.
- API Architecture & Integration: Designed, tested, and integrated REST APIs using Axios for client-side state fetching and Postman for backend endpoint verification.
- Authentication & Role Management: Built secure user management systems using JWT authentication, password hashing algorithms, and role-based access control.
- Database Design & CRUD Operations: Configured PostgreSQL databases to manage structured data schema, execute CRUD operations, and enforce server-side data validation.
- Debugging & Maintenance: Debugged full-stack technical issues across UI components, REST endpoints, and relational database queries using browser dev tools and logging.
- Deployment & Hosting: Deployed Node.js/Express REST APIs and connected them to PostgreSQL databases, configured production environment variables, and troubleshoot deployment and runtime issues.

Interest & Hobby

- Tech research & problem-solving
- Personal development
